

## PRESS INFORMATION

Leinfelden, April 2017

### Transponder-coded safety switch CES-C04 for ATEX applications

The transponder-coded EUCHNER safety switches from series CES-C04-AP/AR can now be used in potentially explosive atmospheres in zone 2 (gases) and zone 22 (dusts). This is made possible by a specially developed plastic housing guard. The CES-C04 is simply placed into this guard. It effectively protects the safety switch against the effects of possible impacts and thereby meets the requirement in the ATEX directive. Status LED indications of the CES-C04 are readily visible through windows in the housing guard. Installed CES-C04 devices in the field can be retrofitted at any time.

**EUCHNER – More than safety.**
