

PRESS RELEASE

Leinfelden, april 2018

The new EKS with USB port for the best compact access management

The electronics are fully integrated into the new Electronic-Key-System EKS with USB port for electronic access control and management. This USB interface allows the device to be connected to PC-based control system technology.

The Electronic-Key adapter is compact enough to fit into the latest control panels with limited installation space.

Its closed and rounded shape prevents dirt deposits and permits simple cleaning, while its FDA-approved plastic allows it to be used in hygienically sensitive areas such as the food industry.

EUCHNER – More than safety.
