REACH Certificate of Compliance

Dear Sir or Madam,

As an industrial consumer of materials, preparations and products, EUCHNER GmbH + Co. KG is affected by statutory requirements as a “**downstream user**” as defined in the REACH Regulation (EC 1907/2006, Art. 3, No. 34 and No. 35).

As a downstream user, we have notified our suppliers about the existing pre-registration and registration obligations for affected manufacturers and importers of chemical substances and have asked them also to work towards compliance with the requirements of the REACH Regulation as regards their own suppliers. To date, we have not yet received any notification that an ingredient subject to registration in our products has not been pre-registered or is in use. At present, we can therefore assume that the ingredients currently in use will continue to be available. Products manufactured by EUCHNER are not subject to registration under the REACH Regulation. A safety data sheet for products from EUCHNER GmbH + Co. KG is also not required as our products do not constitute safety-relevant substances or preparations.

REACH – Declaration of Conformity under the Chemicals Law

According to Article 33 of the REACH Regulation, we are obliged to provide information to our downstream users if one of our products contains a substance of very high concern (SVHC) in a concentration exceeding 0.1 percent by weight. The last update to the ECHA list also included substances contained in our products that exceed 0.1 percent by weight. These substances are required for technical reasons and currently have no alternative. However, our products do not pose any health hazard when used as intended.

Best regards

EUCHNER GmbH + Co. KG
